Sujesh K R

Senior Java Developer

+91 9526494378 sujeshkolathur@gmail.com linkedin.com/in/sujesh-kr-32795610a

PROFESSIONAL SUMMARY

Senior Java Developer with 7+ years building middleware, web applications, and microservices using Java, Spring Boot, and Spring Cloud across retail, telecom, and logistics domains. Hands-on with Azure (Container Apps, APIM, Redis, Key Vault), containerization (Docker, Dapr), API security (OAuth2/JWT/Entra), messaging (ActiveMQ, Kafka, Azure Service Bus), and CI/CD (Azure DevOps, GitHub Actions, GitLab, Terraform). Strong in API design, caching, production troubleshooting, and delivering scalable systems with cross-functional teams.

SKILLS

- **Languages & Frameworks:** Java (8/17), Spring Boot, Spring Cloud, Microservices, REST, GraphQL
- **Cloud & Platforms:** Azure (Container Apps, APIM, Redis, Key Vault), AWS (fundamentals), GCP (fundamentals)
- **Architecture & Design:** API design, RBAC/authorization, caching, asynchronous messaging, distributed systems
- **Messaging & Integration:** ActiveMQ, Dapr, Azure Service Bus, Apache Kafka, RabbitMQ
- **DevOps & Tools:** Azure DevOps, GitHub Actions, GitLab CI, Terraform, Docker, SonarQube, Maven, Postman
- **Databases:** MySQL, Azure Cosmos DB, Redis, Snowflake, MongoDB, Elasticsearch
- **Observability & Quality:** Application logging, Actuator health checks, production debugging, SpotBugs, JUnit, Mockito

WORK EXPERIENCE

Senior Software Developer *08/2024 – Present*
G10X India Pvt Ltd *India (Remote / Hybrid)*

- Building a retail Product Portal for end-to-end vendor and product lifecycle management (idea submission through onboarding and go-live) for a major US grocery brand.
- Architecting and implementing Spring Boot microservices on Azure Container Apps with Dapr-based service invocation for modular, scalable delivery across account, IAM, vendor, product, and notification domains.
- Implementing secure API access with Azure APIM and Entra ID JWT validation, plus Redis-backed authorization/session patterns for role-based access across services.
- Integrating backend product systems via GraphQL and REST; implementing asynchronous workflows with ActiveMQ and Spring Boot to improve decoupling and throughput.
- Optimized large vendor-registration/progress reporting by batching vendor-user listing API calls (configurable batch size), reducing gateway timeouts under high vendor volume.
- Owned CI/CD with GitHub Actions and Terraform-aligned API/infra changes; supported production issues using logs, Actuator endpoints, and JVM diagnostics.

Senior Engineer *12/2023 – 07/2024*
Altimetrik India Pvt Ltd *Bangalore, India*

- Developed internal HR/employee tracking applications to improve organizational efficiency and streamline personal, performance, and departmental data management.
- Partnered with cross-functional stakeholders to gather requirements, deliver enhancements, and support user training/documentation for smooth adoption.

Polytechnic Lecturer *03/2023 – 12/2023*
Government Polytechnic College, Meppadi *Meppadi, Kerala, India*

- Taught diploma-level Electronics and Communication Engineering subjects at a government polytechnic college.
- Prepared lesson plans, conducted laboratory sessions, evaluated student performance, and supported academic administration.

Senior Java Developer *07/2022 – 03/2023*
UST Global *Kochi, Kerala, India*

- Delivered features for a leading US telecom client's cloud security/compliance platform under tight deadlines with direct client collaboration.
- Built Spring Boot / Spring Cloud microservices for policy enforcement and secure asset validation across Azure, AWS, and GCP.
- Implemented GitLab CI/CD pipelines to streamline reliable build and release cycles for distributed services.

Java Developer *07/2018 – 06/2022*
Infosys Ltd *Trivandrum, Kerala, India*

- Developed middleware and REST-based application features across the project lifecycle for logistics and enterprise clients (XPO, Conagra).
- Built Core Java components for XML transformation/processing and Spring Boot REST APIs (Java 8) with JUnit/Mockito unit testing.
- Owned Azure DevOps build/release pipelines; deployed applications to Azure with Azure MySQL for production workloads.
- Led SVN-to-Git migration for the CMX middleware codebase, improving branching, collaboration, and release cadence.

SELECTED PROJECTS

Trader Joe's – Product Portal *G10X — Azure, Spring Boot, Dapr, GraphQL, Redis, APIM*

- Delivered microservices for vendor/product lifecycle; secured APIs via APIM + JWT; used Redis for auth caching and Dapr for service-to-service calls.
- Improved report-generation reliability for large vendor datasets through batched backend API processing and production-oriented logging.

T-Mobile – Cloud Security / Compliance *UST — Java, Spring Boot, Azure/AWS/GCP, GitLab*

- Built microservices for cloud-asset policy compliance and visibility; automated delivery with GitLab CI/CD.

Conagra – Internal Application *Infosys — Spring Boot, Azure, MySQL, Ionic*

- Developed high-performance REST APIs and unit tests; deployed to Azure with Azure MySQL integration.

XPO Logistics (CMX) – Middleware *Infosys — Core Java, XML, Git*

- Implemented Java middleware for XML data transformation; migrated source control from SVN to Git.

Dex – Employee Management *Altimetrik — Internal Application*

- Implemented employee details, performance, and department modules; supported training and documentation for end users.

CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals (AZ-900)
- Infosys Certified Global Agile Developer

EDUCATION

Bachelor of Technology – Electronics and Communication Engineering
College of Engineering, Trivandrum – Kerala University
Jul 2015 – Jul 2018 — Percentage: 72.05%
